

Extension for analyzing Browser Productivity

Functionality : Provide stats about what is watched, for how much time is being watched

Working :

1. Check the chrome history or current website
2. Use AI for topic modeling of each website. May it be a page, video, audio.
3. Store the topics, date, duration in a database. (The topics should be granular. For eg; Main topic : Finance, Sub topic : recession, sub topic : recession in US)
4. Provide Analytics for this data on a dashboard.
